[Largest wind farm in the United States slated to begin commercial operations ›](#)

### U.S. generating capacity for onshore wind farms

**Data source:** U.S. Energy Information Administration, [Preliminary Monthly Electric Generator Survey](#), April 2026

The SunZia Wind Project, the largest wind farm in the United States, is slated to begin commercial operations this month. The wind farm, located in New Mexico, has a total net summer generating capacity of 3,650 megawatts (MW) and is composed of [916 wind turbines](#). SunZia's capacity is more than three times larger than the next two largest wind farms, Alta Wind in Southern California (1,098 MW) and Great Prairie in northern Texas (1,027 MW). The SunZia Wind Project works with a high voltage transmission line to deliver the wind power generated to Arizona and California.

## Data, Analysis, & Projections

### Natural Gas ›

Exploration and reserves, storage, imports and exports, production, prices, sales.

### Petroleum & Other Liquids ›

Crude oil, gasoline, heating oil, diesel, propane, and other liquids including biofuels and natural gas liquids.

### Electricity ›

Sales, revenue and prices, power plants, fuel use, stocks, generation, trade, demand & emissions.

### Coal ›

Reserves, production, prices, employment and productivity, distribution, stocks, imports and exports.

### Nuclear & Uranium ›

Uranium fuel, nuclear reactors, generation, spent fuel.

### Renewable & Alternative Fuels ›

Includes hydropower, solar, wind, geothermal, biomass and ethanol.

### Consumption & Efficiency ›

Energy use in homes, commercial buildings, manufacturing, and transportation.

### Total Energy ›

Comprehensive data summaries, comparisons, analysis, and projections integrated across all energy sources.

### Analysis & Projections ›

Monthly and yearly energy forecasts, analysis of energy topics, financial analysis, congressional reports.
