About this book

This new edition of the near-legendary textbook by Schlichting and revised by Gersten presents a comprehensive overview of boundary-layer theory and its

About the authors

Hermann Schlichting (1907 – 1982) was a German fluid mechanics scientist. He studied the mathematics, physics and applied mechanics at the University of Jena, Vienne and Göttingen and was promoted 1930. From 1931 to 1935 he worked at the Kaiser Wilhelm Institute for Flow Research in Göttingen. After a short period at Dornier in Friedrichshafen where he was responsible for the new wind tunnel he joined the Technische Universität Braunschweig in 1937 and became professor in 1938 at the age of 30. Herman Schlichting became an Emeritus Professor in 1975.
