

Bayraktar AKINCI

The Bayraktar AKINCI is a sophisticated and strategic unmanned combat aerial vehicle (UCAV) designed for superiority across land and maritime domains. This high-performance, twin-engine aircraft delivers exceptional range and endurance for critical intelligence, surveillance, target acquisition, and reconnaissance (ISTAR) missions.

Beyond intelligence gathering, AKINCI is a potent strike platform capable of executing precision air-to-ground and air-to-air missions. Its versatility extends to maritime security operations, including anti-submarine warfare (ASW), surface warfare (SuW), and coastal patrol missions.

Deployed by multiple nations, Bayraktar AKINCI provides a reliable and operationally proven solution for a diverse spectrum of modern operational challenges.

General Information

Basic flight performance criteria

- ✓ Fully Autonomous Flight Control and Triple Redundant Autopilot System
- ✓ Semi-Autonomous Flight Modes Support
- ✓ SATCOM BLOS + Triple Redundant LOS Link System
- ✓ Fault Tolerant and Triple Redundant Sensor Fusion Application

- ✓ Retractable Landing Gear System and Gimbal Camera System

Advanced Features

- ✓ Enhanced Autonomy and Artificial Intelligence
- ✓ Error Resilient System Architecture
- ✓ Redundant Servo Actuator Units
- ✓ Cross Redundant Ground Control Station
- ✓ Precise Auto Take – Off and Landing with Built – in Sensor Fusion
- ✓ Fully Autonomous Take – Off and Landing Independent of Ground Control Systems
- ✓ Compliance with Different Missions

Service Ceiling

40.000 feet

Operational Altitude

30.000 feet

Communication

LOS & BLOS

Operational Range

6.000 km

Hover

24+ hours

Cruise - Maximum Speed

150 - 240 KTAS

MTOW

6.000 kg

Payload Capacity

1.500 kg

Take Off/Landing/Cruise/Taxi

Autonomous

Power Plant

2 x 450 hp / 2 x 750 hp / 2 x 850 hp Twin Turboprop

Payload - ISR

Simultaneous EO / IR / LD, Multi Mode AESA Radar & SIGINT

Payload - Munitions

Laser Guided Smart Munitions, Missiles & Long M

Versions

AKINCI-A, AKINCI-B, and AKINCI-C

Wingspan

20 m

Length

12.3 mt.

Height

4.1 m

Technical Specifications

From Prototype to Reality

Drag left and right

Ground Control Station

- ✓ Radio Systems
- ✓ Pilot Console
- ✓ Internal Conversation Systems
- ✓ Payload Operator Console
- ✓ Image Exploitation Console
- ✓ Rack Type Cabinets
- ✓ Power Systems, Filters
- ✓ Power Supply Units
- ✓ Military Type Two Air Conditioning Units
- ✓ NBC Filtration System
- ✓ NATO Spec ACE-III Shelter Features

Ground Control Station

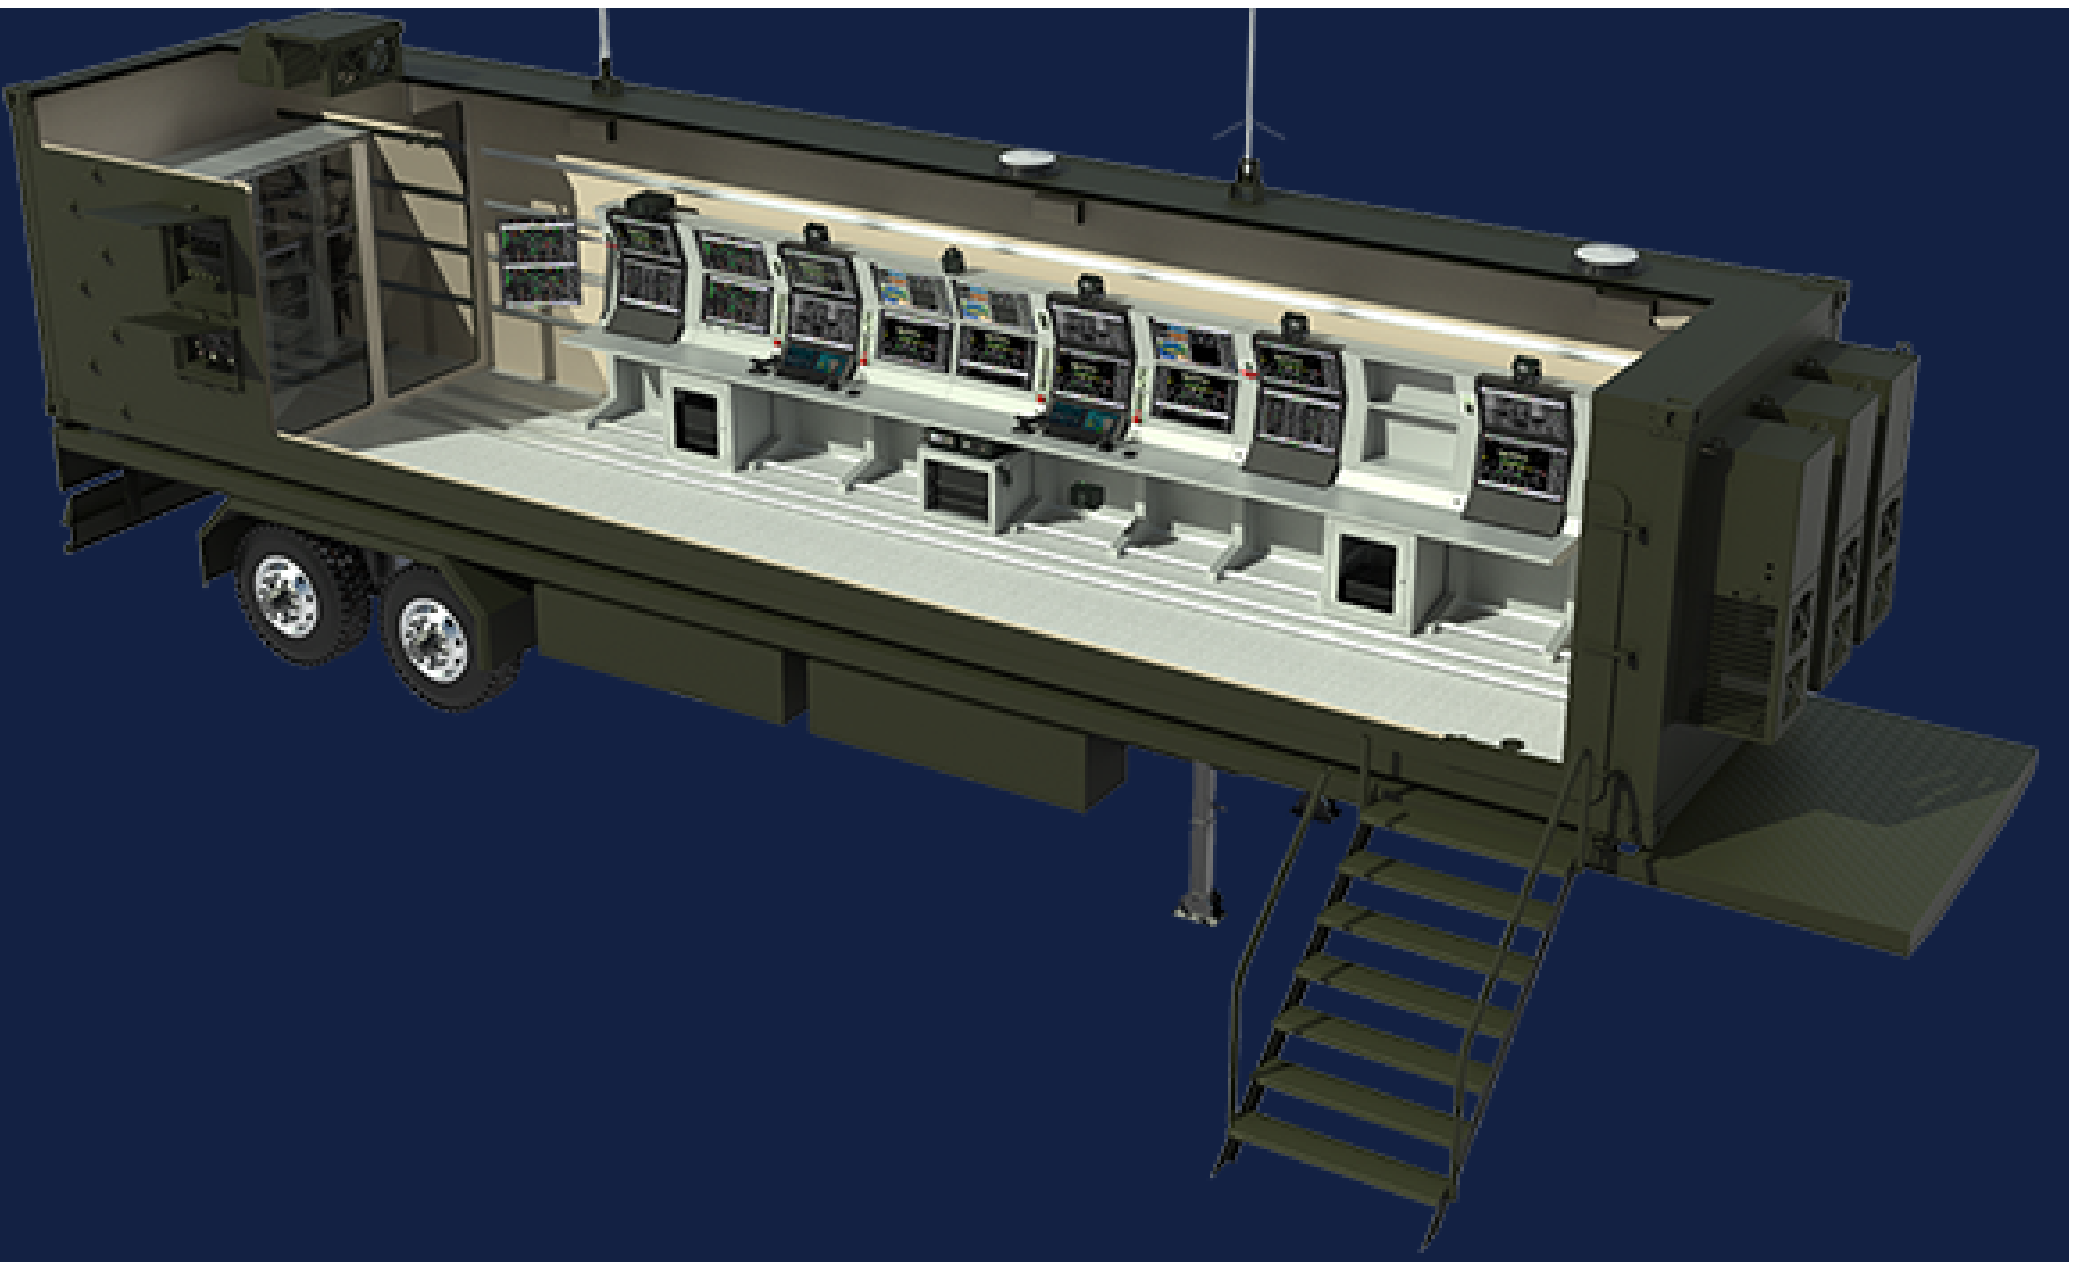

- Trailer Type
- Shelter Type
- Indoor Type

Bayraktar AKINCI uses triple bands for LOS control and video transmission.

Our UAV has BLOS control and video transmission via SATCOM.

BLOS operations can be supported over existing worldwide satellite networks and attendant ground data terminals.

Alternatively, SATCOM data terminals can be supplied.
